Detail View Front

Step 1. Flip the base upside down and rotate the foot to sit perpendicular to the aluminum base with the narrow end pointing to the back of the base.

Included Pieces:

1. Padded Carrying Bag
2. Aluminum Base
3. Banner Rail
4. Telescoping Shock Cord Pole
5. Banner Locking Pin

Step 2. Slide the two pieces of the shock cord pole together.

Step 3. Push open the lock to release the telescoping pole. Push the lock closed to secure the pole once again.

Step 4. Place the assembled pole into the aluminum base on the floor.

Steps 5-6. Pull the attached banner rail upwards to meet the top of the assembled pole.

Step 7. Attach the banner rail to the top of the assembled pole. Unlock the pole and slide the top section upwards or downwards to adjust the height. Re-lock the pole to keep the height.

The banner should not exceed 80 inches. Do not abruptly release the banner from its full height, it will cause the banner to snap down and break. Store in a cool, dry location.
